Yusuf Atakan Özmen

SOFTWARE ENGİNEER

ABOUT ME

I am a 4th-year student majoring in Software Engineering. Following a 1-month internship as a frontend developer, I worked as a frontend developer at Alva Group for 11 months. In the summer of 2023, I gained 1 month of experience as a UI developer at Jotform. With the completion of my studies, I am now actively seeking full-time employment, bringing together my previous experiences to emerge as a proficient software engineer. You can explore my projects on GitHub and find my certifications on my personal website.

EDUCATİON

Malatya Turgut Özal University (2020-2024)
Bachelor's Software Engineering
Anadolu University (2022-)
Computer Programming

EXPERİENCES

Front-End Developer(07.2022-07-2023)
ALVA GRUP

- I have been involved in the front-end development of corporate company websites, utilizing HTML, CSS, and JavaScript languages, as well as the CodeIgniter framework. Additionally, I created an external admin panel for the company, integrated it into the websites, and you can review the codes to access the contact information.

UI Developer (08.2023-09.2023)
Jotform

- I have implemented a project at Jotform related to the routing of tickets received from customers. Currently, the routing process is handled by an individual in the support team. The goal of our project is to assess and route incoming tickets using artificial intelligence. The team member is only responsible for correcting misroutes or canceling the routing.
